2012 Fishing Regulation Consideration List

1. Rescind 16-inch minimum length limit on largemouth bass in Millwood Lake
Current regulation: Largemouth bass limit is three. Largemouth bass must be 16 inches or longer to keep.
Millwood Lake is a 30,000-acre Corps of Engineers reservoir. A 16-inch minimum length limit with a daily limit of 3 was placed on largemouth bass in 1990. Electrofishing results from spring 2004, 2007 and fall 2010 indicate largemouth bass within desired ranges. However, electrofishing data also indicates a decline in the percent of bass available for harvest above 16-inches from 22% in 2004 to only 12% and 11% in 2007 and 2010, respectively. In addition, age and growth analysis conducted in 2007 and 2010 indicate a decrease in growth and relative weight condition factor. Fall 2010 age and growth analysis suggested it takes approximately 5 years for an average largemouth bass to reach 16-inches compared to only 4 years in 2007. It is therefore recommended that the 16-inch minimum length limit for largemouth bass in Millwood Lake be removed to allow anglers to harvest bass of various age/year classes which should lessen competition for forage and improve growth rates and relative weight condition factors.
2. Increase the daily bag limit for harvest of largemouth bass in Millwood Lake from 3 to 6 per day
Current regulation: Largemouth bass limit is three. Largemouth bass must be 16 inches or longer to keep.
Millwood Lake is a 30,000-acre Corps of Engineers reservoir. Since 1990 the daily limit for largemouth bass has been 3 above sixteen inches. Electrofishing results from spring 2004, 2007 and fall 2010 indicate largemouth bass within desired ranges. However, electrofishing data also indicates a decline in the percent of bass available for harvest above 16-inches from 22% in 2004 to only 12% and 11% in 2007 and 2010, respectively. In addition, age and growth analysis conducted in 2007 and 2010 indicate a decrease in growth and relative weight condition factor. Fall 2010 age and growth analysis suggested it takes approximately 5 years for an average largemouth bass to reach 16-inches compared to 4 years in 2007. Data suggests that the largemouth bass population can support some increased angler exploitation, however, harvest under the statewide regulation may become too excessive and significantly increase rates of annual mortality. It is therefore recommended that the daily limit for largemouth bass in Millwood Lake be increased to the current regulation for other Corps of Engineers reservoirs of 6 largemouth bass per day.

3. Increase the bag limit for harvest of largemouth bass in Dr. Lester Sitzes III Bois d'Arc Lake from catch and release to half the statewide daily limit (5)

Current regulation: Largemouth bass are catch and release only.

Dr. Lester Sitzes III Bois d'Arc Lake is 650-acres and located close to the City of Hope. The lake was renovated in the fall of 2002 and restocked with sport fish in 2003. Since 2003 the sport fish daily limit has been half the statewide limit (5) except for largemouth bass, which has been catch and release. Electrofishing results from spring 2009-10 have indicated a robust largemouth bass population. Data suggests that the largemouth bass population can support some angler exploitation, however, harvest under the statewide regulation may become too excessive and significantly increase rates of annual mortality. It is therefore recommended that largemouth bass be included under the current regulation for sport fish in Dr. Lester Sitzes III Bois d'Arc Lake to half the statewide daily limit (5).

4. Increase the daily limit for harvest of smallmouth bass in Greers Ferry Lake from 4 to 6 per day

Current regulation: Daily limit of smallmouth bass is four.

Greers Ferry Lake is a 33,500-acre Corps of Engineers reservoir. Smallmouth bass in Greers Ferry are currently managed under the Ozark Streams Zone regulation which imposes a 12-inch minimum length limit and 4 fish daily limit. Annual electrofishing and bass tournament results indicate a stable, balanced, and sustainable reservoir smallmouth bass population that can support increased angler exploitation. It is therefore recommended that the daily limit for smallmouth bass in Greers Ferry Lake be increased to the current regulation for other Corps of Engineers reservoirs of 6 smallmouth bass per day.

5. Rescind commercial and sportfish harvest restrictions on catfish in the Mississippi River along the common border with the state of Tennessee
Current regulation: Catfish greater than 34 inches in the Mississippi River, along the common border of the state of Tennessee, cannot be kept.

Commercial harvest restriction was placed on catfish in the Mississippi River along the common border with the state of Tennessee. This was done to align regulations with the common border. However, the state of Tennessee has amended this regulation, while Arkansas has maintained the regulation in its original form.

6. Change code language to limit mobility impaired anglers to fishing only from the pier and boardwalk on Dry Run Creek and also allow anglers under 16 years of age to fish from the pier and boardwalk.

Current regulation: Fishing is limited to youths under 16. Fishing from the pier is limited to mobility impaired anglers only.

Current code book language states that fishing from the pier on Dry Run Creek is limited to mobility impaired anglers only. Per the code, anglers under 16 years of age would be prohibited from fishing on the pier. Local Wildlife Officers have been reluctant to enforce this regulation if they have observed young anglers fishing from the pier. Additionally, the facilities for mobility impaired fishing at Dry Run Creek have recently been expanded and improved. No major conflicts resulting from overcrowding on the pier have been observed to date and the improvements mentioned above would even further reduce this potential. This change would have the additional benefit of insuring that the mobility impaired angling opportunities on Dry Run Creek are not being misused. This code was inadvertently changed within the past few years.

7. Remove Bob Courtway Pond from the Family and Community Fishing Regulations

Current regulation: Family Fishing Program Restrictions.

This is a small, fenced pond that is only used for derbies.

8. Increase the Dr. Lester Sitzes III Bois d'Arc Lake special commercial fishing season by 1 month

Current regulation: Fishing season is a month long (Feb. 1 – 28).

A two month commercial fishing season by permit only to be held in January and February for the purpose of reducing the population of buffalo is needed in Dr. Lester Sitzes III/ Bois d'Arc Lake. By reducing the population of buffalo, the biomass of buffalo can be shifted to more desirable species such as bluegill, redear and largemouth bass. Participating commercial fishers will be required to obtain a free permit from the Southwest Regional Office prior to setting tackle. Tackle used will be limited to gill or trammel nets with a 3 ½ inch bar mesh minimum.

9. Include Clay County under the Ozark zone for smallmouth bass, which has a minimum length limit of 12 inches with a daily limit of four.

Current regulation: Statewide regulations for Clay County. Randolph County falls under the Ozark zone for smallmouth bass.

In an effort to simplify the regulations, we are recommending placing Clay County under the Ozark zone smallmouth bass regulations. The Current River flows through both Randolph and Clay counties. Randolph county falls under the Ozark zone smallmouth regulations, whereas Clay county does not. Therefore, to simplify, be consistent and to better enforce the smallmouth regulation, Clay County should be placed under the Ozark zone regulations.

Hunters and fishermen licensed in only one state cannot hunt or fish in the tributaries, bayous or backwaters of the Mississippi River in the other state except as specifically provided herein. Hunters or fishers cannot hunt or fish from, nor attach any device or equipment to private property, in either state, without the landowner's permission.

Nothing herein shall be construed to allow any person to hunt, fish, or go upon the lands of another landowner or entity without their permission. Floodwater which has overflowed the natural banks of a public waterway is not part of the public waterway and permission of the landowner must be obtained.

It shall be incumbent on each individual hunter or fisherman to identify the state line.

This agreement may be cancelled by the Tennessee Wildlife Resources Agency's Executive Director or the Arkansas Game and Fish Commission's Director upon sixty (60) days written notice.

WHITE RIVER LAKES LICENSE AGREEMENT BETWEEN ARKANSAS GAME AND FISH COMMISSION AND MISSOURI DEPARTMENT OF CONSERVATION

The Missouri Department of Conservation and the Arkansas Game and Fish Commission hereby establish a White River Border Lakes License to fish the impounded waters of Bull Shoals, Norfork and Table Rock Lakes with the following provisions:

- (A) Any person age 16 and older possessing a valid Missouri resident fishing permit or Arkansas resident fishing license, or who is legally exempted from those license requirements, and possessing the White River Border Lake License may fish in the Missouri and Arkansas impounded waters of Bull Shoals, Norfork and Table Rock Lakes.
- (B) All anglers shall abide by the laws and regulations of the state in which they are fishing.
- (C) The White River Border Lakes License is not valid for possession of trout.
- (D) The White River Border Lakes License is valid for all impounded portions of these lakes except for the designated trout waters on Table Rock Lake upstream from the Houseman Access in Arkansas.
- (E) The annual cost of the White River Border Lakes License will be \$10 and may be changed at any time with the mutual agreement of both agencies. Revenue generated from the sale of this license will be disbursed annually to the states, such that, Missouri Department of Conservation

would gain all revenue from the sale of this license to Arkansas residents and Arkansas Game and Fish Commission would gain all revenue for the sale of this license to Missouri residents. This agreement became effective March 1, 2001. It may be cancelled by the Missouri Conservation Commission or the Arkansas Game and Fish Commission or modified by mutual agreement.

CHAPTER I1.00
VIRAL HEMORRHAGIC SEPTICEMIA VIRUS IMPORTATION REQUIREMENTS

I1.01 Viral Hemorrhagic Septicemia Virus (VHSV) Fish Importation Requirements

* * * * *

I1.01 VIRAL HEMORRHAGIC SEPTICEMIA VIRUS FISH IMPORTATION REQUIREMENTS.

For purposes of these requirements, the following definitions shall apply:

- (1) **Appropriate Fish Sample** -- 150 fish representing all fish lots and culture units present on a farm or facility. The ratio of fish lots on the farm or facility should be reflected in the composition of the sample. The sample should not be collected from tanks or raceways used for short-term storage of fish produced in other culture units.
- (2) **Appropriate Season** -- the first day of spring until the first day of summer and the first day of fall until the first day of winter.
- (3) **Appropriate Testing Methods** -- cell culture followed by an appropriate confirmatory test. The protocol must be as described in the inspection section of the most recent edition of "American Fisheries Society – Fish Health Section Blue Book," or must be conducted according to approved protocols in a laboratory listed by the U.S. Department of Agriculture's Animal and Plant Health Inspection Service approved to test for VHSV.
- (4) **Culture Units** -- ponds, raceways, cages or other containments used to rear fish.
- (5) **Farm-raised** -- fish that spend their entire life (egg to sale) on a farm or commercial facility.
- (6) **Lot** -- a group of fish of the same age, from the same broodfish, and that live on a single farm or facility in water from the same source.
- (7) **Qualified Independent Party** -- a veterinarian, a fish health inspector certified by the Fish Health Section of the American Fisheries Society, or an employee of a state agency recognized as a competent authority for fish health and assigned by that agency to collect fish inspection samples and verify biosecurity.
- (8) **Qualified Testing Laboratory** -- any state, federal, or private laboratory recognized by the AGFC as competent to conduct fish inspections.
- (9) **VHSV-free Water Source** -- water from a well, borehole or spring (the spring must be covered and free of fish) which does not contain VHSV.
- (10) **VHSV-positive State** -- any state in the U.S. or any Canadian province listed by the U.S. Department of Agriculture's Animal and Plant Health Inspection Service as positive for viral hemorrhagic septicemia virus (Illinois, Indiana, Michigan, Minnesota, New York, Ohio, Pennsylvania, Wisconsin, Ontario and Quebec).
 - (A) A Fish Farm Health Inspection Permit may be issued to persons who submit on forms supplied by the Commission satisfactory documentary proof including the following information:
 - (1) Proof an appropriate fish sample has been collected by a qualified independent party during the appropriate season and submitted to a fish health inspection laboratory for analysis;
 - (2) Inspection reports from a qualified testing laboratory asserting the sample tested negative for VHSV by appropriate testing methods; and
 - (3) Written documentation from a qualified independent party asserting the fish are farm-raised, the farm or facility uses a VHSV-free water source, and fish or eggs to be shipped to Arkansas have not been mixed with, or potentially

contaminated by, fish or water not meeting standards specified for a Fish Farm Health Inspection Permit.

To be eligible for a Fish Farm Health Inspection Permit, a farm or facility must provide written documentation from a qualified independent party verifying the farm or facility has a biosecurity plan sufficient to prevent contamination of permit-eligible fish by ineligible fish or by water not from a VHSV-free source, and the farm or facility follows the biosecurity plan without exception. The fish health inspection report must be no more than 60 days old from the date of reported test results at time of application for Fish Farm Health Inspection Permit from Commission.

- (B) An annual Fish Farm Health Inspection Permit is issued in two six-month intervals in compliance with Commission Addendum D1.01. The first interval is Jan. 1-June 30, and the second interval is July 1-Dec. 31. The second interval of the permit will be issued only after new semi-annual testing results are submitted to the Commission. Annual renewal may be granted based upon submission to the Commission of new documents as described in (C) above that include new semi-annual testing results. Failure to conduct a semi-annual inspection will result in a one-year suspension of the Fish Farm Health Inspection Permit.
- (C) Exceptions: A Fish Farm Health Inspection Permit shall not be required for import of live fish from a VHSV-positive state if:
 - (1) The fish are moving to a state-inspected slaughter facility meeting the following criteria:
 - a. The slaughter facility must discharge wastewater into a municipal sewage system that includes wastewater disinfection.
 - b. The slaughter facility must either render or compost offal, including carcasses.
 - (2) The fish are moving to a qualified diagnostic facility for disease testing.
 - (3) The fish are ornamentals and meet the following criteria:
 - a. The fish are moving directly to a home aquarium.
 - b. The fish are moving to wholesale or retail distributors of ornamental fish and will be held in aquaria, tanks or lined pools.

* Denotes nonnative species

Hybrids

It is our intent that production or sale of any hybrid is permissible if both parent species are included on the Approved Aquaculture Species List.

Wild Crayfish

The harvest and sale of native Arkansas crayfish species that naturally colonize aquaculture ponds and are cultured incidental to production of other aquaculture species is allowed.

Wild Turtles

The harvest and sale of native Arkansas turtle species that naturally colonize aquaculture ponds and are cultured incidental to production of other aquaculture species is allowed, unless the species is protected by other codes see Commission Chapter 34.00.

Aquarium Species

It is not the intent of this policy to constrain aquarium trade. Marine and tropical aquatic species commonly distributed in the aquarium trade may be sold without special permit, as long as they are held only in closed aquarium systems and are not prohibited by other codes (e.g. Commission Code 26.13).

Restricted Species

Some species are well established in Arkansas aquaculture but under criticism at regional and/or national levels. While we do not currently restrict the trade in these species, persons possessing or desiring to possess these species are required to apply to AGFC for a Restricted Species Possession Permit. This permit will detail the location of their facilities, measures taken to eliminate the possibility of escape, and the numbers and species to be held (these numbers are best

estimates and will only be updated when permit is renewed for the next year). The permitted culture of any restricted aquaculture species shall be conducted in a responsible manner that minimizes the possibility of escape. Permitted aquaculturists are required to construct a barrier that prevents escape of juvenile and adult fishes from culture ponds. Pond drainpipes should be double screened prior to any pond drainage with at least one screen being of a mesh size small enough to prevent the passage of any permitted fish present in the pond. These and any other measures listed on the application to eliminate the possibility of escape will be considered the “best management practices” that the applicant agrees to implement. AGFC will maintain records of the number and location of these species in the state, and determine if sufficient precautions are taken to prevent escape into the waters of the state. AGFC will review applications based on the best information available to evaluate the potential for escape. If this potential is acceptably low, AGFC will grant a no-cost special holding permit for these species, renewable annually. In the event that restricted aquatic organisms are released or escape from a permitted facility into waters of the state, the permittee shall notify the AGFC immediately. The permittee shall not be responsible for unforeseen occurrences such as floods, lightning or sabotage. Facilities with ponds prone to flooding shall limit culture of Restricted Species to areas least likely to become inundated. Holders of Restricted Species Possession Permits are expected to assure that buyers of these species in Arkansas also have an approved permit. Failure to comply with permit terms or inability to show adequate measures of escape prevention may result in permit denial or revocation.

The species covered by these permits include the following:

Family Cyprinidae

Hypophthalmichthys molitrix (Silver Carp)

Hypophthalmichthys nobilis (Bighead Carp)

Diploid *Mylopharyngodon piceus* (Black Carp)

Scardinius erythrophthalmus (European Rudd)

EXAMPLE 1: A producer maintains diploid black carp to produce triploid black carp for sale to catfish farmers to control snails in their ponds. The individual has previously applied for a Restricted Species Possession Permit for diploid black carp, documenting sufficient measures to prevent escape and been issued a no-cost permit. The individual may sell triploid black carp to his customers and may sell diploid black carp to other black carp producers after ensuring that they also have Restricted Species Possession Permits to possess diploid black carp.

EXAMPLE 2: A food fish producer purchases bighead carp, holds them in raceways for a few days, then ships them to an out-of-state fish market. The individual has previously applied for a Restricted Species Possession Permit for bighead carp, easily documenting sufficient measures to prevent escape (held in raceways with blocked egress) and been issued a no-cost permit. The individual is then able to purchase the fish, hold them, and ship them to other markets (assuming it is in compliance with regulations of the destination state).

Turtles

The turtle species listed below are native to Arkansas and may be cultured by those who obtain a Commercial Turtle Dealer/Breeder Permit from the Commission and report production by species (Commission Chapter 34.00).

Family Chelydridae

Chelydra serpentina (Common Snapping Turtle)

Family Emydidae

Chrysemys picta dorsalis (Southern Painted Turtle)

Deirochelys reticularia miaria (Western Chicken Turtle)

Graptemys geographica (Common Map Turtle)

Graptemys ouachitensis (Ouachita Map Turtle)
Graptemys pseudogeographica kohnii (Mississippi Map Turtle)
Pseudemys concinna (River Cooter)
Trachemys scripta elegans (Redeared Slider)

Family Kinosternidae

Kinosternon subrubrum hippocrepis (Mississippi Mud Turtle)
Sternotherus carinatus (Razorback Musk Turtle)
Sternotherus oderatus (Common Musk Turtle)

Family Trionychidae

Apolone spinifera (Spiny Softshell)
Trionyx muticus muticus (Midland Smooth Softshell)

Other Species Covered under Separate Permits

The following species are governed by separate code and have their own permit requirements. This policy does not seek to add any further permitting requirements for these species.

Family Alligatoridae

Alligator mississippiensis (American Alligator) – Federal Permit Required

Family Chelydridae

Macrolemys temminckii (Alligator Snapping Turtle) – AST Farmer/Dealer Permit Required

Permits to Culture Unlisted Species

Requests to import and culture species not listed in this policy will be evaluated on a case-by-case basis. The burden of proof will rest with the applicant to show measures are in place to prevent the possibility of escape will have no significant ecological impact (i.e. species can not survive in waters of Arkansas due to temperature, salinity, or other environmental factor). The permitted culture of any unlisted aquaculture species shall be conducted in a responsible manner that excludes the possibility of escape from culture ponds. Permitted aquaculturists are required to construct a barrier that prevents escape of juvenile and adult fishes from culture facilities. The applicant will also need to provide justification as to the need to import the species into the state and why species listed in this policy will not fill the need. In the event that unlisted aquatic organisms are released or escape from a permitted facility into waters of the state, the permittee shall notify the AGFC immediately.

EXAMPLE 1: A producer in southern Arkansas wishes to raise yellow perch. This species is not native to Arkansas and has begun to show up in reservoirs in the north part of the state. Since the habitat in the producer's area is hostile to yellow perch (water chemistry and summer temperatures), AGFC issues an Unlisted Aquaculture Species Permit.

EXAMPLE 2: A producer wants to grow Australian redclaw crayfish. This species is not native to Arkansas (or the U.S.) but is found in comparable latitudes in Australia. The producer's plans are to raise them inside in heated raceways and have no discharge. This is found to eliminate the chance of escape and AGFC issues an Unlisted Aquaculture Species Permit.

PERMIT PROCESSING PROCEDURES

Permit Renewal

Restricted Species Possession Permits and Unlisted Aquaculture Species Permits will be issued on an annual basis to correspond with expiration dates of Fish Farmer Permits. The Arkansas Game and Fish Commission is responsible for providing renewal notices to permit holders six weeks in advance of permit expiration date. Existing permits will remain in effect past listed expiration date if a renewal application is pending.

Permit Review

Restricted Species Possession Permits and Unlisted Aquaculture Species Permits are granted at the approval of the AGFC. The AGFC may solicit input as needed in the review of individual applications.

Modification of Lists

Any individual may petition AGFC to add or remove species on the *Approved Aquaculture Species List* or the *Restricted Aquaculture Species List*. The petition must provide thorough documentation of why a species should or should not be included on a list. Petitions should address the biological threat of the species, including native range, habitats utilized, movement patterns, spawning requirements, reproductive rate, food habits, and temperature and water quality limitations. They should include documentation of any introductions or escapes outside the species native range. They should also evaluate the potential impacts to native species through predation, competition, disease transmission, and displacement. Petitions should include copies of all pertinent reference material.

Petitions to add or remove species on the *Approved Aquaculture Species List* or the *Restricted Aquaculture Species List* will be responded to by the Chief of Fisheries after consultation with an advisory board representing: Arkansas State Aquaculture Coordinator, Stuttgart National Aquaculture Research Center, Aquaculture / Fisheries Center at UAPB, U S Fish & Wildlife Service, Arkansas Natural Heritage Commission, and Arkansas Game and Fish Commission staff.

CHAPTER 01.00
Alligator Farmer Restrictions

- O1.01 Alligator Farmer/Dealer General Provisions**
- O1.02 Specifications and Facility Standards for Alligator Farms**
- O1.03 Harvest and Sale of Alligator Restrictions**

* * * * *

O1.01 ALLIGATOR FARMER/DEALER GENERAL PROVISIONS

- (A) Shipping tickets, invoices or bills of lading shall be maintained for all alligators purchased or sold to verify they have been obtained from a legal source and not from the wild stock of the state, and complete written records of all changes in alligator stock shall be maintained for a minimum of five years from the date of each transaction to verify sources of supply and disposition of alligator stock.
- (B) Facilities and records shall be subject to random inspection by enforcement officers of the Commission;
- (C) Upon request or inspection by the Commission, an alligator farmer/dealer shall disclose ownership of all alligators and provide documentation of inventory of initial and subsequent numbers of all alligator eggs and alligators. Documentation shall demonstrate the inventory is commensurate with production and survival levels for captive populations in compliance with biological standards adopted by the Commission or the U.S. Fish and Wildlife Service.
- (D) Each alligator farmer/dealer shall report annually to the Wildlife Management Division by Jan. 31 on a form supplied by the Commission all activities that have occurred during the previous calendar year (Jan. 1- Dec. 31), including, but not limited to: the number of live alligators (separated by sizes); the number of eggs collected and hatched; information on the purchase and sale of alligators, hides and parts; and the numbers of alligator deaths. Failure to accurately complete this form may result in the non-renewal or revocation of the Alligator Farmer/Dealer Permit.
- (E) The advertisement or representation of caimans or crocodiles as alligators is prohibited.
- (F) No alligator farmer/dealer or his or her employees shall receive or transfer any alligator, eggs or hides except in compliance with Commission regulations.
- (G) Permits to establish and operate alligator farms are not transferable.

O1.02 SPECIFICATIONS AND FACILITY STANDARDS FOR ALLIGATOR FARMS

- (A) An alligator farm must contain suitable land and habitat to support a population of adult alligators in outside breeding ponds and adequate area for the construction of holding houses for young alligators up to three years of age. There must be a reliable source of fresh water and equipment

- for pumping and changing water. Breeding ponds shall be fenced around the perimeters with woven wire or board fences of sufficient height (minimum 4 feet) and tightness, constructed to prevent the escape or entrance of any size of alligator. Fences shall be buried or otherwise secured at the bottom to prevent entrance or escape. Breeding ponds must have at least one area at least 6 feet deep and suitable nesting sites.
- (B) Pens or holding facilities shall be constructed to prevent the egress and ingress of alligators. The alligator farmer shall provide rearing tanks of concrete, fiberglass, plastic or metal construction for alligators less than 4 feet. Alligators less than 2 feet shall be housed separately from those 2-4 feet. On-site propagation facilities shall provide ponds, nest sites and space for breeding adults and artificial incubators.
 - (C) Holding houses containing an adequate number of artificial tanks shall be provided for growing small alligators 6 feet or less. A sufficient number of tanks shall be provided to allow for segregation by age/size/classes, and each tank shall be permanently numbered to facilitate accurate record keeping. There shall be sufficient space in each tank for all alligators to completely submerge under water at one time and enough dry area to run around for basking purposes. A properly constructed tank will consist of 2/3 water for 1/3 dry area. The overall size of the tank shall depend upon the number of alligators held, but as a general standard each alligator should have enough space to submerge without having contact with another alligator. Holding tanks shall be designed to permit periodic cleaning of water and a complete change of water at least every other day.
 - (D) An alligator farmer shall provide security sufficient to ensure no alligators, eggs, or other parts can be moved in or out of the alligator farm without the farmer's knowledge.
 - (E) Permitted alligator farms shall be subject to inspection by Commission personnel at any time.
 - (F) An alligator farmer shall make all alligator eggs produced on the farm available for inspection by Aug. 1 of each nesting year. All alligator eggs shall be in containers having not more than one layer of eggs in at least one incubation facility on each alligator farm. Only viable alligator eggs will be credited to the egg inventory. Eggs laid after Aug. 1 may be collected and added to the egg inventory only if egg development characteristics indicate a laying date after Aug. 1 and nests are verified by Commission personnel prior to being collected.
 - (G) A controlled environmental chamber complete with an incubator shall be provided for hatching of eggs. The chamber shall also contain a sufficient number of holding tanks to accommodate anticipated hatchlings and to provide a suitable environment for newborn alligators.

O1.03

- (B) An alligator farmer/dealer may sell, barter, exchange, give or loan any live alligators of at least 23 inches provided written approval is first obtained from the Commission for each transfer. If sold, bartered, or exchanged in interstate commerce or foreign trade, the legal requirements of the state or country involved in the transaction must also be satisfied.
- (C) Any request for written approval to sell, barter, exchange give or loan any live alligators must be made in writing at least two weeks before the proposed transaction date, contain the name and address of the proposed buyer, reference the dealer's permit number or other authority for possession and describe each alligator by length, belly size, and sex, if known.
- (D) A live alligator under 23 inches may be sold, loaned or donated to an accredited zoological park or to an Arkansas state or federal agency for educational use provided written approval is first obtained from the Commission. The request for approval must be made in writing by both the alligator farmer/dealer and the educator, describe each alligator by length, belly size, and sex, if known, detail where each alligator will be housed and list the party responsible for the care and housing of each alligator.
